DATA DOWNLOADED
AND STORED IN TCMS V2
SUGGESTIONS & SOLUTIONS FOR TCMS V2

LAST UPDATE 09 JULY 2012

Raw data downloaded to TCMS v2 will be displayed in Terminal Data Audit List. You will find this Terminal Audit List in FingerTec Terminal Settings in TCMS v2:

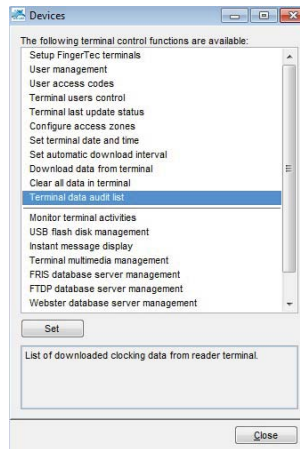

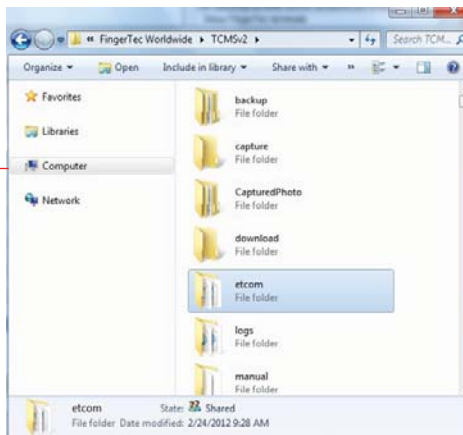

Please double click **Terminal Data Audit List** to start viewing the list.

These are the raw data obtained from a reader to TCMS v2. Please take note that these are real time clocking activities between reader and TCMS v2. You will see clocking data of user even if you have not downloaded the attendance data. Therefore, it is advisable to download the data after you have read this list.

You also can check the data download history of TCMS v2. You will find a text file in TCMS v2 folder, which records the date and time of download processes and the itemized attendance data downloaded.

You will need to open the TCMS v2 program folder and look for a folder named "etcom".

Open this file by using "notepad"

Download process was done at this date and time.
