

EXAMPLE OF SETTING UP TERMINAL FING@RTEC. USER CONTROL & ACCESS CODE

You can set up access codes for users in order to manage their access rights to certain doors within specified period.

Example, user 00001 can only access to a door from 8:00pm to 10:00pm. You may have to configure the time zone for this specific time period as shown below:

Step 1

Access to Terminal User Control.

The following terminal control functions are available: Setup FingerTec terminals User management User access codes Terminal users control Terminal last update status Configure access zones Set terminal last update status Configure access zones Set automatic download interval Download data from terminal Clear all data in terminal Terminal adta audt list Monitor terminal activities USB flash disk management Instant message display Terminal multimedia management FRIS database server management FRIS database server management Set Use this setting to define each terminal's authorized user access codes, with optional accessible time zone definition.
